This guide is original, paraphrased player instruction. It contains no story text, manual pages, or hint passages. The story file and reference material remain local and are not included in the repository.

Route tested 2026-10-16 with GrueGPT CLI; optional --seed 1 makes combat repeatable.

Player walkthrough

Follow the numbered stages in order. Keep the lantern on underground and conserve it outdoors.

1

01. Prepare the house

Open and read the mailbox leaflet, then go south and east. Open the loose window, enter the house, and take the brass lantern from the living room.

```
open mailbox; read leaflet; go south; go east; open window; enter house; go west; take lamp
```

2

02. Open the cellar and collect the painting

Move the rug and open the trapdoor. Take the painting from the gallery by way of the cellar and studio chimney. In the attic collect the knife and rope. Put the painting in the case, then take the sword.

```
move rug; open trap door; go down; go south; go east; take painting; go north; go up chimney; go up; take knife; take rope; go down; go west; open case; put painting in case
```

3

03. Clear the troll and reach the dome

With the lantern lit, enter the cellar and defeat the troll with the sword. Leave the sword behind. Go east twice, southeast, then east to the dome; tie the rope to the railing and descend.

```
turn on lamp; go down; go north; kill troll with sword until dead; drop sword; go east; go east; go southeast; go east; tie rope to railing; go down
```

4

04. Recover the Egyptian treasures

Visit the Egyptian room for the coffin, then return to the altar and pray. The prayer moves you outdoors. Switch off the lantern while crossing the forest and canyon to the rainbow beach. Open the coffin, take the sceptre, wave it to reveal the gold, then carry the treasures back to the case.

```
Torch Room south; Temple east; take coffin; return Temple south; pray; turn off lamp; follow the forest path to End of Rainbow; open coffin; take sceptre; wave sceptre; take gold; return to Living Room; put coffin, gold, sceptre in case
```

5

05. Operate the dam

From the cellar, go north through the troll room and east-west passage, then north through the chasm to the reservoir. Take matches in the lobby and the wrench and screwdriver in maintenance. Push the yellow button, return to the dam, turn the bolt with the wrench, and leave the wrench there.

```
go down; go north; go east; go north; go northeast; go east; go north; take matches; go north; take wrench; take screwdriver; push yellow button; return to Dam; turn bolt with wrench; drop wrench
```

6

06. Defeat the spirits

Reach the Torch Room by returning through the round room, engravings cave, and dome. Carry the torch to the shaft later, but keep the lantern on underground. In the Temple collect the bell; at the altar take the candles and black book. Descend to Hades, ring the bell, pick up and relight the candles, then read the book. Drop both candles and book, take the skull, and return by the mirror route.

```
Temple: take bell; Altar: take candles and book; down twice; ring bell; take candles; light match; light candles with match; read book; drop candles; drop book; turn on lamp; south; take skull; return via Cave and Mirror Room
```

7

07. Reach the mines with the needed tools

Rub the mirror, continue north, then west through the slide and mine entrance. Carry the garlic from the kitchen to discourage the bat. Take the jade figurine in the Bat Room. At the shaft put the torch and screwdriver in the basket before entering the gas passages.

```
rub mirror; north; west; north; west; north; east; put torch in basket; put screwdriver in basket
```

8

08. Collect the bracelet and coal

Descend from the shaft through the smelly room and gas room. The bracelet is in the gas room. Continue through the coal-mine passages and ladder to the dead end, take the coal, then return to the shaft and lower the basket with the coal and screwdriver.

```
Shaft north; down; take bracelet; east through the mine; northeast; southeast; southwest; down twice; south; take coal; return up to Shaft Room; put coal in basket; lower basket
```

9

09. Make the diamond

Go down through the mine to the Timber Room and Drafty Room. Retrieve the coal and screwdriver from the lowered basket. In the machine room put the coal in the machine, close the lid, turn the switch with the screwdriver, then open the lid and take the diamond. Put the torch and diamond in the basket and raise it from the shaft.

```
Drafty Room: take coal and screwdriver; south; open lid; put coal in machine; close lid; turn switch with screwdriver; drop screwdriver; open lid; take diamond; basket: put torch and diamond; return to Shaft Room; raise basket
```

Player walkthrough (continued)

Commands are grouped for readability; perform each action in sequence.

10

10. Return the mine treasures

Retrieve the diamond and torch at the shaft, collect the jade, skull, and bracelet from their earlier locations, then leave by the mine entrance, slide, cellar, gallery, and studio chimney. If the chimney refuses your load, leave heavier objects in the studio and make another trip. Deposit the mine treasures when back at the living room.

```
take diamond; take torch; collect jade, skull, bracelet; Mine Entrance south; Slide Room down; Cellar south; Gallery east; Studio north; go up chimney; deposit treasures
```

11

11. Retrieve the trunk and trident

With the dam drained, go north from the chasm to the reservoir. Take the trunk, then continue north for the pump and trident. Bring the pump to Dam Base and inflate the plastic boat. To keep the boat route clear, leave the trunk, trident, and bracelet at Dam Base for pickup on the return.

```
Reservoir: take trunk; north: take pump; north to Atlantis: take trident; return south to Dam Base; inflate plastic with pump; drop pump; drop trunk, trident, bracelet
```

12

12. Sail to the sandy beach

Board and launch the boat. Wait until the current carries you to the fast water and the buoy appears. If the first buoy attempt advances the boat, try again at the next prompt. Take the buoy, move east to the sandy beach, leave the boat, and take the shovel.

```
go inside boat; launch; wait until fast current; take buoy; if needed take buoy again; go east; leave boat; take shovel
```

13

13. Find the scarab and emerald

Go northeast into the sandy cave. Dig the sand exactly four times and take the scarab. Return to the beach, open the buoy, and take the emerald. Retrieve the garlic, then follow the shore south, cross the rainbow, switch off the lantern, and return to the house through the canyon and clearing.

```
go northeast; dig sand four times; take scarab; go southwest; open buoy; take emerald; take garlic; go south twice; cross rainbow; turn off lamp; return to Living Room
```

14

14. Deposit the river treasures

Put the emerald and scarab in the case. Make a short lantern-lit return to Dam Base, take the trunk, trident, and bracelet left there, and return through the round room and cellar to deposit them.

```
put emerald and scarab in case; turn on lamp; cellar; Troll Room; chasm; Reservoir South; Dam Base; take trunk, trident, bracelet; reverse route; put all three in case; turn off lamp
```

15

15. Take the egg and enter the maze

From the house, go behind it and north to the large tree. Climb up, take the jeweled egg, and climb down. Return to the living room, turn on the lantern, descend to the cellar, and follow the maze route to the skeleton. Take the leather bag of coins and skeleton key.

```
go east twice; go north twice; climb tree; take egg; climb down; return to Living Room; turn on lamp; go down; north; west; south; east; up; take coins; take key
```

16

16. Use the cyclops password

Navigate southwest, east, south, and southeast to the cyclops. Say “Ulysses” to make it flee, then go up into the treasure room. Give the egg to the thief. Leave by the stairs, go through the east passage to the living room, and deposit the coins.

```
go southwest; go east; go south; go southeast; Ulysses; go up; give egg to thief; go down; go east twice; put coins in case
```

17

17. Kill the thief and recover the loot

Take the knife in the living room and return through the passage and cyclops room. Go up to the treasure room. Use the knife until the thief is dead. Drop the knife, matchbook, and garlic to make room, then take the returned treasures. Drop the stiletto and take the torch and chalice.

```
take knife; Strange Passage west; Cyclops Room west; go up; kill thief with knife until dead; drop knife, matchbook, garlic; take all; drop stiletto; take torch; take chalice
```

18

18. Open the grating and wind the canary

From the treasure room return through the maze to the grating. Unlock and open it with the skeleton key, climb to the clearing, and go to the tree. Wind the clockwork canary. When the songbird drops the bauble, take it; drop the key if needed to make room.

```
go down; maze route to Grating Room; unlock grate; open grate; go up; go south; climb tree; wind up canary; climb down; take bauble
```

Player walkthrough (continued)

Commands are grouped for readability; perform each action in sequence.

19

19. Complete the trophy case

Return to the living room and deposit the bauble, chalice, canary, egg, bracelet, skull, and torch. The other recovered treasures should already be there. Confirm the complete 19-item collection.

```
return to Living Room; put bauble, chalice, canary, egg, bracelet, skull, torch in case
```

20

20. Take the platinum bar

Descend from the living room through the cellar, troll room, and east-west passage to the round room. Enter the Loud Room. If the room ejects you before you can act, return to the round room and enter again. Once you can remain, echo and take the platinum bar. Return to the case and deposit it.

```
go down; go north; go east twice; enter Loud Room; echo; take bar; west three times; south; up; put bar in case
```

21

21. Read the final map

After the bar goes into the case, look inside and read the parchment map. The verified run ended at 350 of 350 points, with the map revealed as the final secret.

```
look in case; read map
```

Unique opcode/mnemonic inventory

Each distinct instruction form, opcode number, and mnemonic appears once. Count is occurrences in the fresh winning run.
First seen gives the trace sequence and program counter for that instruction.
